

Dear sir or madam:

My name is Xiaksiayu(English name:Summer),and I am from Beijing Normal University.This summer, I spent a wonderful time in Tokyo Gakugei University through the activity “ the Summer Program for Trilateral Cooperation (SPTC)” .

(1)Express my appreciation

First of all,I want to express my appreciation to all of the people who I met in Japan. The teachers in TGU are so nice that I am touched by their professional dedication.There are so many precious memory between us in my heart,and I want to express my gratitude to every teacher first,I thank them for their efforts to make this event go smoothly.

I still remember the first day when we arrived at the hotel ,the Miss.Shimizu and Miss.Kim sona help us to check in hotel,they are very patient to tell us one by one how to do it ,I see how serious they are in the details.Miss.Kim is proficient in Korean and Japanese,and I admire her very much.I am also very grateful to them for their help on the last day.I lost my computer by accident, the above two teachers gave me great help,Miss. Kim helped me to contact Miss. Shimizu and then,Miss. Shimizu thought of many ways to help me find my computer at the lost and found office of the bus stop. I feel very sorry for the trouble I caused,and I want to say thanks again.♥♥♥♥♥

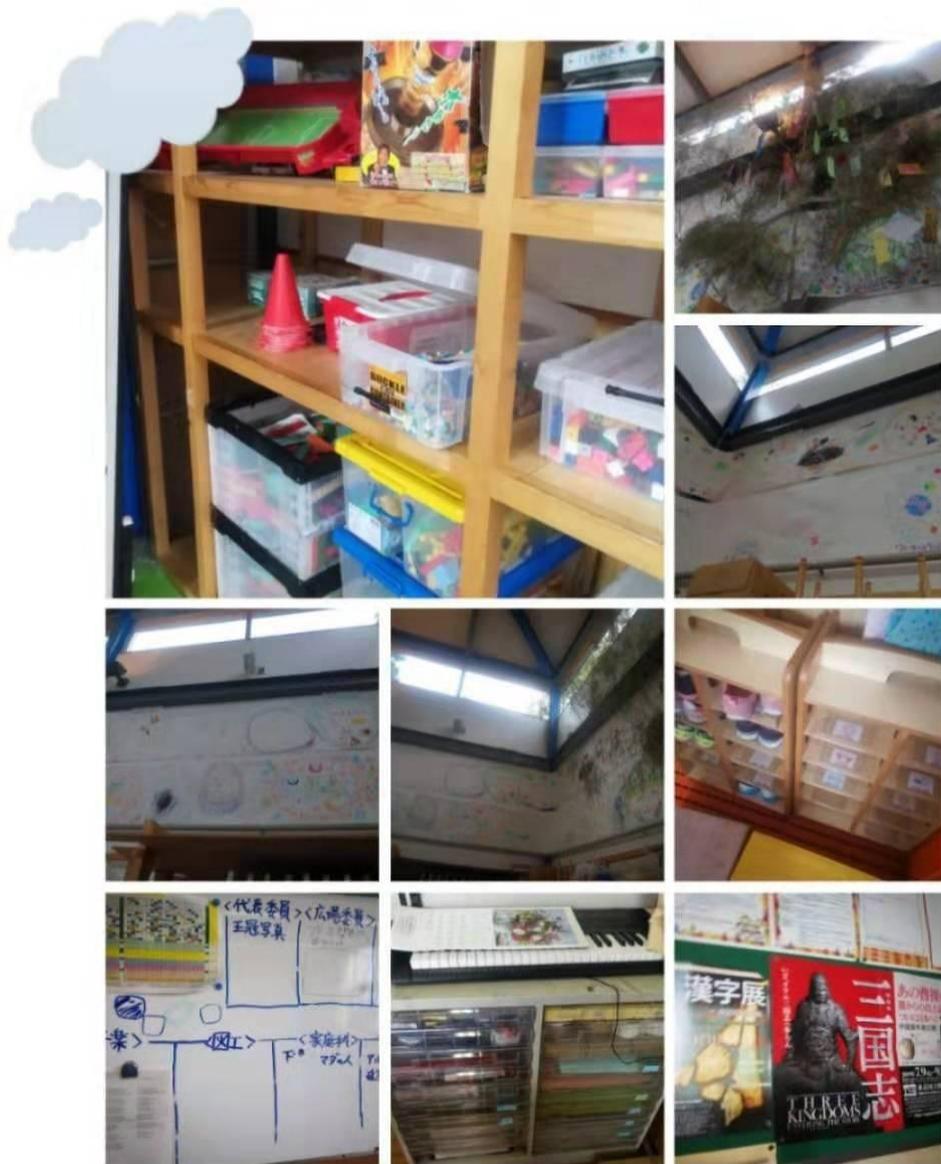

I never forget the second day we had a party together, I still remember the teacher told us about his abroad life experience, he advised us to cherish our short-time abroad life even the most ordinary things, it's very precious in retrospect. The professor Tsubaki is so kind and approachable, when she calls my name "summer", I feel very warm and I never forget although the weather was so hot, the professor still accompany us to walk around the park and explain the scenic spots carefully. ❤️❤️❤️❤️

I also want to express my gratitude to professor Shimoda, he is also a very kind teacher and I am surprised to find that he is proficient in Chinese. When I have some problems in teaching primary school students, he patiently answered the questions. When he knows my major is special education, he introduced me to the special education professor especially. 🧡🧡🧡🧡

(2)What I learned

I learned a lot from the two lectures taken by professor Murayama and professor Maehara. I know the situation of inclusive education in Japan by listening the professor Murayama who gave a comprehensive lecture about "Lesson Study and Teachers' Professional Development in Japan". The professor Maehara introduced the topic about "School in Japan", I understand the reason why people regard the job of teacher as "black job" in Japan.

This short-term exchange program provides the opportunities for us to learn Japanese education, culture and society, in particular, we took part in many activities and visited different types of schools in Japan, such as Gakugei no Mori Nursery School and After-school Child Day Care, TGU Affiliated Setagaya Elementary School and Chuo University Junior and Senior High School.

/ L O V E

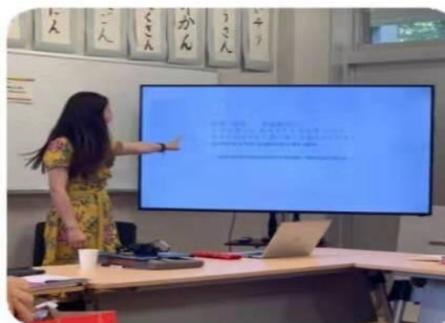

We had a chance to communicate with the Japanese teacher face to face, and I felt so lucky when Miss. Saito (Home Economics teacher) presented a book called lifestyle book for me, I could know more information about the subject of home economics which was different from China, and I thought we should attach importance to this subject.

It also gave us a chance to make friends with graduate students of Seoul National University of Education and Tokyo Gakugei University. I learned a lot about the team spirits from Korean teachers when they took lesson for Japanese primary students, they were well prepared and their teaching methods were very creative. I felt so warm when volunteers helped us to do a lot of things, we had a good time together. It was my first time to visit Japan and I also had lots of first time memories in Japan. My first time to see the fireworks、 experience the Japanese calligraphy、 play the Japanese drum and have tea ceremony lessons and so on. It made me know more about Japanese culture and it deeply attracted me.

★ IT'S COULD MEET THEE AFTER LONG YEARS.

TODAY

有梦为马，
随处可栖。

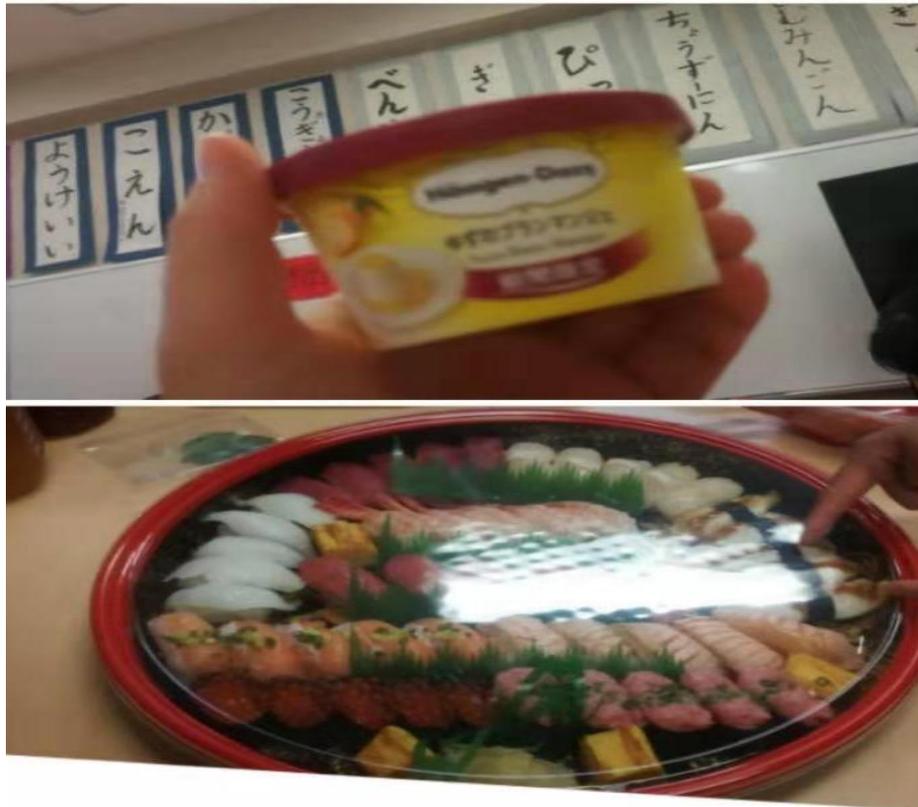

(3)What I saw

Due to the fact that my major is special education, so I paid attention to the barrier-free facilities in Japan particularly.I found that they were better to take into account the needs of people with disabilities.I was surprised to find there were too many books about my major in the TGU's library,so it attracted me to study in this university in the future.

Of course ,I never forget the last day we had a wonderful sushi feast together.Thanks to all the teacher of the Asia Campus program again.Without your hard work,there would be no enriched experience for us in Japan.

When we had a chance to talk about the education between different three countries,I found that even though we had different kinds of problems in education , both of us still recognize the importance roles of teachers in education.

As a future teacher, I believe we will try our best to improve the condition of education in our country.All in all ,it's a good opportunity for teachers from different countries to learn from each other in the context of globalization.
